ACCESSIBLE EDUCATION CENTER

LEARNING OUTCOMES REPORT

2012 / 2013

INTRODUCTION

During the Academic Year 2012/2013, in continuing with the Division of Student Affairs charge to participate in student Learning Outcomes (LO), the LO Assessment Committee reasoned that the Accessible Education Center's (AEC), formally known as the Disability Resource Center (DRC), first two LO's continue to be vital to the academic success of students with disabilities. To this end, the AEC has maintained its process of ascertaining students' skill sets with respect to students' knowledge of their disability and accompanying functional limitations (see Appendix A for a comprehensive outline of the Process).

Learning Outcome #1:

- a. Student can name his/her specific disability with ease.
- b. Student can describe his/her specific disability with ease (e.g. student can provide one to three characteristics/symptoms of the diagnosed disability).
- c. Student can articulate (through concrete examples) how the effects of his/her disability impact the student in an academic setting.
- d. Student can communicate to others (including professors) the ways that the functional limitations of his/her disability impact the student in an academic setting.

Learning Outcome #2:

- a. Student understands the impact of the functional limitations of his/her disability on specific curriculum requirements and can determine reasonable accommodations.
- b. Student can communicate to professors the need for curriculum-related accommodations.

The student Learning Outcomes assessed the following student skills:

1. Disability diagnosis knowledge and elaboration accuracy (LO #1a and b)
2. Knowledge of accommodation needs and the relationship of disability needs to curriculum requirements (LO #2a)

ASSUMPTIONS

The following assumptions were acknowledged by the LO Assessment Committee:

- Students will answer the questions posed on the *AEC Confidential Student Intake Form* honestly and freely.
- Students are not answering questions to please the Counselor or to portray themselves more positively.
- Students accept that they have a disability as evidenced by their registration with the AEC.

METHODOLOGY

Upon first registering with the AEC, new or existing University students completed the following two questions on the *AEC Confidential Student Intake Form* which correlated to LO #1 and #2 respectively (see Appendix A for a copy of the instrument) :

- “What is the name of your disability(ies)? If the specific name of your disability is not coming to mind, simply explain what the disability is in a few words.”
- “Provide at least one example of how your disability(ies) impacts you in your daily activities (i.e., in the classroom, studying, talking tests, reading, etc.).”

Five hundred thirty (530) received and completed an intake form. For the purpose of this data collection temporary disabilities were not included in the data analysis. Three hundred ninety three (393) completed the aforestated questions by means of self-report. Of the 393 students, 36 students were categorized as having a mobility disability, 126 were categorized as having a learning disability; and 231 students were categorized as having a functional disability. Disability categories follow the CSU Chancellors definition. For clarification on disability categories, please go to the CSU Chancellors homepage.

The *AEC Confidential Student Intake Form* solicited information to assist AEC counselors in providing students with individualized academic support specific to their disability related functional limitations and potential impact on curriculum requirements. Two professional counselors, a 60% professional staff decrease in comparison to the previous fiscal year, met one-on-one with students and conducted an intake via the interactive process. The intake process was standardized and conducted in the following manner:

- Counselors utilized information presented by the student on the *AEC Confidential Student Intake Form* to begin the discussion with the student;

- Counselors recorded student responses on the *Learning Outcomes Counselor Response Sheet* and rated student responses on the following scale: No, Somewhat, and Yes (see Appendix A for a copy of the instrument). While the *AEC Confidential Student Intake Form* aimed to determine students' **perceptions** of their disability, the *discussion* with the counselor aimed to determine the **accuracy** of students' disability knowledge and functional limitations. The in-person assessment permitted the counselors to observe the students' responses to the questions and into the students' nonverbal communication.
- Counselors verified students' information while referencing submitted documentation to validate whether the student could name his/her disability and accompanying functional limitations;
- Based on the students' responses, the counselor proceeded with the intake using one of two discussions:
 - Student correctly named his/her disability:
 - Counselor initiated a holistic discussion with the student regarding his/her disability, utilizing the counselor's professional knowledge along with the student's input. Using the example(s) provided by the student with regard to the daily impact of his/her disability (i.e. in the classroom, studying, taking test, reading, etc.), the counselor and the student discussed the information for clarification and application to the student's coursework.
 - Student could not name his/her disability:
 - Counselor utilized student's submitted documentation in conjunction with the counselor's professional knowledge to inform and educate the student concerning the nature of his/her specific disability, as well as the functional limitations presented by the disability. Given that the student either provided a limited example, or was unable to provide an example regarding the daily impact of his/her disability (i.e. in the classroom, studying, taking test, reading, etc.), the counselor worked with the student to identify specific functional limitations which could potentially impact curriculum requirements. Subsequently, the counselor worked together with the student in reviewing course syllabi to extrapolate information to assist in determining level of impact the disability would have on the curriculum, if any.

RESULTS

Counselors engaged with 393 students new to the AEC, ranging from freshman to senior standing as well as graduate students and transfer students. There were disparities between students' perceived notions of their disability, and presenting functional limitations, as well as the actual disability diagnoses, and functional limitations. Each time a students' perception did not match accurate disability-related information, counselors educated students. Counselors referred to the disability documentation in the student's case file in conjunction with the counselor's disability knowledge when educating students. What follows is data on students' expressed knowledge of their disabilities and the impacts of their disabilities on daily activities as assessed by the end of the intake session with the counselor.

Statement One: "What is the name of your disability(ies)? If the particular name of your disability is not coming to mind, simply explain what the disability is in a few words."

In response to the first question on the *AEC Confidential Student Intake Form (assesses perceptions)*, "What is the name of your disability(ies)? If the particular name of your disability is not coming to mind, simply explain what the disability is in a few words." Following the student's self-report during the intake session, the counselor discussed the response with the student and recorded the student's oral response on the *Electronic Learning Outcomes Counselor Response Sheet (assesses actual knowledge)* using the following scale to determine whether the objective was met: "Yes, Somewhat, or No".

Responses revealed the following:

- 333 (84.73%) students accurately named their disability and could effectively explain the disability;
- 10 (2.54%) students could not name their disability or explain it; and
- 50 (12.72%) students could somewhat name and explain their disability.

Statement Two: "Provide at least one example of how your disability(ies) impacts you in your daily activities (i.e., in the classroom, studying, taking test, reading, etc.)"

In response to the second question on the *AEC Confidential Student Intake Form (assesses perceptions)*, "Provide at least one example of how your disability(ies) impacts you in your daily activities (i.e., in the classroom, studying, taking test, reading, etc.)" Following the student's self-report during the Intake session, the counselor discussed with the student his/her response and recorded the student's oral response on the *Electronic Learning Outcomes Counselor Response Sheet (assesses actual skills*

demonstrated) using the following scale to determine whether the objective was met: “Yes, Somewhat, or No”.

Responses revealed the following:

- 340 (86.51%) students accurately provided at least one example of how their disability impacts them in their daily life;
- 9 (2.29%) students could not provide an example; and
- 44 (11.20%) could somewhat provide an example.

As expected, the positive results for LO # 2 exceeded the positive results of LO # 1 by 1.78%. AEC believes this can be attributed to the fact that students often find it easier to provide examples of the effects of their disabilities instead of identifying the disability itself. In comparison to the previous year the positive results for LO #2 decreased by 6.41%. AEC is uncertain as to why the decrease in LO #2 given historical data which demonstrates the opposite. However, AEC continues to see the trend shift from secondary education and community college transfers where students come from a “check and balance” system to an independent university system.

Given the complexity of disability management and the evolution of ones’ understanding of their disability, the interactive process with an AEC counselor continues to be a critical component to assisting a student to further understand and manage their disability in an independent university system and their daily life activities.

Learning Outcome	2011/2012	2012/2013	Change
LO 1	87%	84.73%	-2.27%
LO 2	93%	86.51%	-6.49%

LIMITATIONS

Portions of the LO data collected may have been affected by the change in staffing that occurred in Fall 12 and Spring 13, during which one AEC counselor was on leave and one AEC counselor vacated her position. In addition, the AEC transitioned to an Electronic Learning Outcomes Counselor Response Sheet to streamline data collection process and minimize duplication of clerical procedure for professional counselors. This change in tracking method presented challenges in recording data in real time due to staffing limitations and high volume of new and returning students to AEC.

ONGOING ASSESSMENT

Currently, the Learning Outcomes for students are assessed during their initial intake meeting with an AEC counselor. This is effective in providing a baseline of the students' knowledge of their own disabilities and the impact of the disability on their lives. In order to assess students' ongoing progress toward the learning outcomes, the AEC is considering implementing an additional tier of data collection to the Learning Outcome assessment process in the future. This additional tier may include the collection of qualitative data in the form of a self-evaluation/survey from all new and returning AEC students. This data will be collected each semester to monitor the students' responses and will implement a method of data collection that can be modified to assess other learning outcomes in the future as necessary.

Appendix A

AEC Learning Outcomes 2012 – 2013 Process Procedures

Instrument: *AEC Confidential Student Intake Form*

Assessment Tool: *Electronic Learning Outcomes Counselor Response Sheet*

AEC LEARNING OUTCOMES 2012 - 2013 PROCESS PROCEDURES

Learning Outcomes

Newly registered students will work one-on-one with an AEC Counselor to:

1. identify their specific disability; and
2. Identify their functional limitations resulting from the disability.

AEC Goals

- To assess the level of student's disability knowledge to facilitate a successful learning experience
- To assist students in gaining an understanding of his/her functional limitations and how the functional limitations will/will not impact his/her curriculum requirements

Target Population

- New students exclusively
(definition of new student: new to AEC, **NOT** SJSU)

LO Timeline

- Data Collected July 1 2012 to June 30 2013
- Assessment report: Summer/Fall 2013

Procedures

1. Susan/student assistant receives completed *AEC Confidential Student Intake Form* from student prior to meeting with counselor to ensure student has signed his/her initial at the bottom of page one and completed LO questions.
2. *AEC Confidential Student Intake Form* is scanned to the student's confidential file by Susan/student assistant.
3. Susan/student assistant gives hard copy of student's *AEC Confidential Student Intake Form* to scheduled counselor for meeting with student.
4. When counselors are finished with the *AEC Confidential Student Intake Form* counselors place the intake form in the "To Be Filed" box on the student assistant desk[†]
5. Intake forms collected to a central file.
6. Susan/student assistant to file *AEC Confidential Student Intake Form* in the central file
7. Counselors to retain individual *Learning Outcomes Counselor Response Sheet*[†]

Action Steps

1. When Front Desk schedules appointment, informs student to arrive 15 minutes early to complete *AEC Confidential Student Intake Form*
2. Prior to first meeting with counselor, student completes *AEC Confidential Student Intake Form* answering questions pertaining to his/her disability as accurately as he/she is able to
3. During student's scheduled appointment, counselor begins dialogue with student regarding student's disability utilizing student's *AEC Confidential Student Intake Form* responses as a guide
4. Counselor determines student's disability knowledge and accuracy based on student's Intake process and student submitted disability documentation
8. Counselor completes *Learning Outcomes Counselor Response Sheet*[†]

† Forms used for the 2012-2013 LO assessment report. As of August 1, 2012, responses are paperless and are recorded by counselors in the student database.

Disability Information

The information you provide below will assist DRC Counselors in providing you with individualized academic support specific to your disability related limitations and curriculum requirements.

Please provide responses, in a few sentences, below.

ALL INFORMATION WILL REMAIN CONFIDENTIAL.

1. What is the name of your disability(ies)? If the particular name of your disability is not coming to mind, simply explain what the disability is in a few words.

2. Provide at least one example of how your disability(ies) impacts you in your daily activities (i.e., in the classroom, studying, taking tests, reading, etc.).

DRC OFFICE USE ONLY - Parking Only:
