

Disability Resource Center  
Learning Outcomes  
Fall 2005 / Spring 2006

The Disability Resource Center (DRC) has developed three student Learning Outcomes to enable the DRC to assist students effectively and to ensure a systematic cycle of program evaluation and improvement.

Upon completion of a semester, registered DRC students will:

1. identify their specific disability and functional limitations resulting from the disability;
2. demonstrate the ability to determine and state their accommodation needs; and
3. describe the process involved in requesting disability accommodation for curriculum requirements.
