
American Commemorative Stamps & Panel

brief

Research a significant Design Event or Milestone that holds your interest. Become familiar with the event or milestone circumstances and context. Design Stamps & Panel encapsulating the historical significance—the panel is a textbook at a “glance”, or everything one should know to be informed about this design event.

The Panel should be a visual overview using both photographic examples, concise copy covering the major aspects of the Design Event. Include relevant, names, biographical data, dates and locations of important projects, etc.

As you design your stamps and panel, interpret or incorporate significant ideas and/or isms into your look and feel. The stamp and panel should not be an imitation of style, but homage to the work, and extension of the philosophy.

Organize the verbal and visual elements on the panel so the piece communicates on several levels, from the quick glance to an in-depth examination.

American Commemorative Panels are for collectors who are looking to add new distinctive appeal to their collections. Design should be unique and “richly detailed”. Consider the panel as limited–edition collectibles, or showcase quality.
